

Remote Policy Evaluation Methods course

Speaker

Barbara Sianesi

Selected feedback Nov 2021 – Apr 2023

April 2023

The course is fabulous. Exactly what I was hoping for. Thanks very much!

Really well delivered, the pre-recorded lectures are really excellent, and the format of the 3 live days also. The live days were great and really helpful. Really appreciated that Barbara encouraged questions and took time to answer them.

Explaining the intuition and the practicals, and the intuition behind the coding and results it shows is really helpful.

The course is very detailed and covers a wide range of topics in policy evaluation.

Very comprehensive, authoritative introduction to the area. Very fortunate to have had the opportunity to attend. Many thanks to Barbara!

January 2023

Overall incredible useful, one of the best econometric courses I've been on.

It is quite convenient and accessible and the instructor did several tips to make it engaging and enhance collaboration across the participants.

The course was really useful and the pre-class materials were great! Very helpful way to get started. Barbara was a great course lead and answered the questions very well.

I enjoyed having it online. As Barbara mentioned, it allows me time to take in the course contents before the live sessions.

Thank you for being so full of energy and positive! It really helped. Also the sessions were a good length.

very accessible pre recorded lectures. good mix of more and less complicated things

Overall, great course. The checklists will be useful for me going forward.

The quality of the video lectures was outstanding.

November 2022

I think it's been great to focus on the practical aspects during the live classes as it really enhanced my understanding, in particular having Barbara walk through the steps involved with real data and explain how to interpret the results.

Pre-class materials were excellent and very thorough. The lectures have been useful to cement what was covered in the videos. The stata code files are also incredibly useful and detailed

I have a lot of experience with most of the methods we covered but I still learnt a lot and it was great to learn from Barbara's vast experience

really useful to have practical exercises integrated into the course sessions

Online interactions were great, Barbara is very personable and engaging. Thank you for making his course available so widely.

Excellent course - I have learnt so much and I am looking forward to applying this in my work. Many thanks Barbara!

Barbara was a great tutor who was super responsive over emails even before the classes began, and explained everything really well :)

June 2022

Would like to start by saying Barbara is an excellent teacher and has an amazing energy. She really makes this course what it is.

the videos are great, because I can stop them if I need to review something in a better detail. Also I can split them into several days if I don't have that much time. And the exercises seem to be good.

Fantastic course, thanks

Really engaging and interesting, and appreciated the practicals especially.

Extremely helpful, well explained.

March 2022

Online format was nice and flexible.

Just to stress how amazing the lectures and practicals were, found the content really engaging and very clear

this exceeded my expectations!! having the recordings prior to the live sessions allow you to make the most out of this course !!

Barbara is a very charismatic teacher - great course

Barbara is brilliant!

Barbara was fantastic. Very knowledgeable and friendly. Presenting all these complex methods in such simple and clear way deserves praise. I think the course was very useful and well organised. The abundant material in pre-recorded videos delivers a well-balanced but also challenging course. The range of methods explored is about right

Thank you for a super informative, engaging course - I really enjoyed it and will be recommending to colleagues

January 2022

I find it extremely useful for my PhD thesis research.

Videos very good. Nice to have the time to go through them in our own time.

My experience has been positive. I have attended online courses in the past which have suffered terrible technical problems. The set-up was excellent. Barbara is excellent! The course is covered in good detail and you don't feel like you have to find supplemental material to illustrate the basic concept of the material.

our mentor is just awesome

Barbara was very helpful and answered all of my questions

Thank you for an informative, intense, interesting course. There are many informations to process and a good thing about the online format is that you can skip part of the lectures depending on your own interest/prior knowledge etc. I actually think that the online format is very well suited for this type of course. Also, Barbara is a very competent instructor - big credit to her :-)

I think online interactions are always tricky and I think that Barbara did a good job trying to engage us, giving us the opportunity to join breakout rooms etc. I don't have any suggestions

November 2021

Online format worked well. It's easier to digest the information over time, than an intense inperson course.

wonderful! This is my expected course.

Very well prepared materials. Really good lecturer, especially in the recorded lectures

it's a great course! Many thanks

excellent professor

I really enjoyed the format of the course. It was explained very well and instructions were sent out well in advance. Barbara was also very helpful with any additional requests!
